# Prosegur Compañía de Seguridad

<b>Your Company Score</b>	
Activity group average	<b>TBD*</b>
Regional average	<b>TBD*</b>
Global average	<b>TBD*</b>

\*Average scores will be released along with the score report.

CDP recognizes that organizations operating in different primary sectors are affected by and manage environmental issues in alternate ways. To capture this sectoral specificity in the calculation of the final score, CDP utilizes a weighting system during score calculation at the Management and Leadership levels.

All scored questions in the questionnaire are allocated to a scoring category for each scored environmental issue area. The weighting of each category reflects its relative importance for the sector in the overall score.
